

SOIL LEGEND

The first capital letter in each symbol is the initial one of the soil name. A second capital letter, A, B, C, D, E, or F, if used, shows the slope. Most symbols without a slope letter are those of nearly level soils, such as Bibb loam, or of land types, such as Gullied land, that have a considerable range of slope. A final number, 2 or 3, in the symbol, shows that the soil is eroded or severely eroded.
